-Price Breakthrough RF Analyzers-

Atlanta Georgia – January 2009. Today, Mark Kaltman, President of Kaltman Creations LLC announced the introduction of a new Handheld RF Spectrum Analyzer that breaks all “Spec vs. Price” barriers. The new model, the Spectran HF60100, is a handheld RF analyzer which features the following outstanding specifications:

Frequency range of 1MHz to 9.4GHz, Sensitivity of -130dbm, Bandwidth Resolution of 1KHz, 0.5PPM stability and an Accuracy of +/-1db.

The HF60100 was introduced on the heels of the award winning* Kaltman Spectran HF4040. Sharing many of the same features and functions, the HF60100 continues Kaltman Creations’ line of affordable RF spectrum analyzers. The HF60100 sets the pace for unbeatable performance at an unbelievable price, thousands of dollars less than comparable units.

The HF60100 is sold as a complete analysis kit which includes: HF60100 (1MHz – 9.4GHz) RF analyzer, optional internal pre-amp, an SMA stick antenna, a precision handheld LOG Periodic antenna, AC charger / adaptor, aluminum carrying case, mini-tripod stand, 6-foot USB cable, PC software and documentation. **Priced at \$4,975**

Kaltman said, “The timing for this analyzer couldn’t be better with the exponential use of wireless technology and the increased challenges of identifying interference and available frequencies.” Created for field RF analysis, where bringing out an expensive or bulky bench-size analyzer is not reasonable, the HF60100 fills the need at a price that is affordable for anyone.

For more information on the HF60100, other Kaltman analyzers and their line of antennas, please visit their web site at www.RFAnalyzers.com

*Advancement for Radio Technology (ART) award and the prestigious TEC Award Nomination.

Kaltman Creations LLC is dedicated to the design & development of new and unique products for the wireless, professional audio, IT & broadcast industries. With the introduction of the world’s first handheld motorized cable coiler; a unique new cable tie product; and low-cost RF spectrum analyzers and Log Periodic antennas, Kaltman Creations is setting the pace for innovative and highly unique product offerings.
